

SkyTrap

The premier cyber counter-drone solution

Designed to automatically detect, take over and safely land unauthorized commercial drones in a designated zone

An autonomous End-to-End solution

DETECT
24/7 Monitoring of perimeter

IDENTIFY
Live location, height, speed

CONTROL
Safely land in a predefined zone

PREVENT
Deny take-off within a protected area

Designed for urban environments

- Non-Jamming No impact on wireless communications and GPS signals
- Non-Kinetic Surgical, no collateral damage
- No line of sight Suited to dense urban environments
- Friend / Foe Selective, pinpoints rogue drones

With advanced cyber capabilities

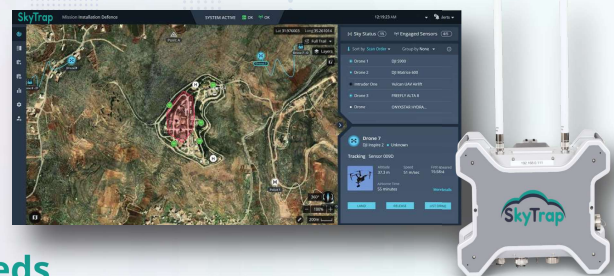

- Locate and track operator
- Multiple drones detection and mitigation
- Supports wide coverage of consumer drones

Suitable for different operational needs

Stationary - Portable - Vehicle

Easily installed in any site

Connects to existing infrastructure, simple set-up and configuration

Correctional Institutions
